How to build a bumblebee nest

You will need:
- terracotta flower pot
- trowel
- dry grass or moss
- sheltered spot that gets some sun

1. Dig a small, shallow hole under a bush. Your chosen site should not get too hot or too cold, and be in sun for about half of the day.

2. Fill the flowerpot with dry grass and/or moss.

3. Half-bury the flowerpot upside down in the hole. Position it at an angle so that the hole in the bottom points out.

(preferably under a bush)
